FRIENDS OF THE NATIONAL INSTITUTE OF NURSING RESEARCH

FNINR's **VISION** is to improve health through expanding support for NINR.

FNINR's **MISSION** is to strengthen and magnify NINR's impact in advancing nursing science.

The Friends of the National Institute of Nursing Research (FNINR) is an independent, non-profit organization founded in 1993. Nurse researchers are grounded in clinical nursing practice and focused on the physical, mental, emotional and social needs of patients. They recognize the illness and the presence of health risk factors affecting the overall well-being of individuals.

The healthcare community faces new challenges and opportunities to improve patient care each year. With the continuing leadership provided by NINR and the support of FNINR, nurse researchers will continue to contribute to the enhanced health and well-being of all Americans, especially in a time when cost-effectiveness and quality of care are equally championed by the public and the Nation's decision makers.

NATIONAL INSTITUTE OF NURSING RESEARCH

The National Institute of Nursing Research (NINR) was established as a Center at the National Institutes of Health (NIH) and as an Institute in 1986. This placement among the 27 Institutes and Centers within the NIH has added a new scientific perspective to enrich the Nation's biomedical and behavioral research endeavors.

NINR's mission is to promote and improve the health of individuals, families, communities, and populations. The mission is accomplished through support of research in scientific areas such as chronic and acute diseases, health promotion and maintenance, symptom management, health disparities, caregiving, self-management, and the end of life. NINR also supports the training of new investigators who bring new ideas and help to further expand research programs. The ultimate goal of NINR's research is its dissemination into clinical practice and into the daily lives of individuals and families.

*FNINR President
Cathleen Wheatley,
DNP, RN, CENP*

2021: The second consecutive International Year of the Nurse and the Midwife

On behalf of the FNINR Board of Directors, we welcome you to our second virtual NightinGala as we continue to respond to the ongoing COVID-19 pandemic and to embrace the recommended measures to keep our FNINR community of stakeholders safe. Although we all miss and treasure seeing each other in-person, what this pandemic has taught us is that our collective commitment to supporting NINR has not been thwarted by a virtual presence. The FNINR Board of Directors thanks you for your generous and steadfast support of the NightinGala with your event and table sponsorships again this year. In and of itself, this is testimony to your resolve to support NINR's efforts to advance nursing science and at a time when it is so desperately needed.

For the second consecutive year, we join the World Health Organization (WHO), the American Nurses Association (ANA), and global colleagues in celebrating the International Year of the Nurse and the Midwife to recognize the extraordinary challenges faced, and contributions made, by nurses around the world in responding to the COVID-19 pandemic. Like no other event in modern times have the contributions of nursing been so highlighted, exposing the need to increase support for nurses on the front lines of care, and for nursing practice, education, and research.

Tonight we celebrate the outstanding contributions made by nurse researchers and the value their work has had, and will have, on improving lives and the health of our nation. We celebrate them and their achievements as we celebrate the ongoing contributions of NINR to this body of science. Throughout FNINR's 28-year history, we have advocated at both local and national levels through our Advocacy Committee and our Ambassadors Program to ensure continued federal financial support for NINR so that it can continue this important work. We are committed to communicating far and wide the impact of nursing research to ensure it is known, recognized, and understood for its critical value in advancing health. It is work that is never done.

The FNINR Board of Directors extends its thanks and recognition to AMR management services, and especially to our Executive Director Liz Fossett. Without her leadership and the support of the entire AMR team, we would not be as successful in our efforts. I would also like to thank FNINR's Past President, Dr. Connie Delaney, who so wisely led FNINR during her 2 years as President and has left me in good stead as I begin mine.

Most especially, we thank all of you for joining us on this journey and for making tonight a very special chance to celebrate the scientific foundation of our nursing profession. Let's be bold in our joy!

Awards

2021

ADA SUE HINSHAW AWARD

The Ada Sue Hinshaw Award is considered the pre-eminent award given by FNINR named in honor of the first permanent Director of the National Institute of Nursing Research. Recipients have a substantive and sustained program of science that would afford her/him recognition as a prominent senior scientist.

THE PRESIDENT'S AWARD

The President's Award is given based on a specific theme established by the President of FNINR, varies annually, and is awarded to a researcher with sustained contributions in the field. This year, the theme is "race, ethnicity, culture, and disparities in healthcare" aimed at research that explores differences in quality of care for racial, ethnic and/or cultural minorities. The research should identify contributing factors, effective interventions, or evaluation of interventions.

WELCH/WOERNER PATH-PAVER AWARD

The Welch/Woerner Path-Paver Award is given to a mid-to-late career nurse scientist who has achieved one or more breakthroughs in theory development, research methods, instruments, or subject matter that has paved the way for other scientists and who has influenced and mentored the next generation of nurse researchers.

FAYE GLENN ABDELLAH AWARD

The Faye Glenn Abdellah Leadership Award is named for this renowned nurse researcher. Faye Abdellah's vision has resulted in inestimable value created by nurse scientists over the years. This award will go to an organization or individual with a sustained or lasting impact on nursing science either through advocacy, institutional leadership, or individual program of research that has led to the public awareness of the value of nursing science in improving health at the individual and/or population levels.

PROTÉGÉ AWARD

The Protégé/Protegee Award is given to an evolving nurse scientist who shows great promise in advancing science and who is within the first 6 years of completing either the PhD or Post-Doctoral study.

THE
*Faye Glenn
Abdellah* LEADERSHIP
AWARD

Ellen J. Hahn

PhD, RN, FAAN

Ellen J. Hahn is a Professor in the Colleges of Nursing and Public Health at the University of Kentucky (UK) in Lexington. She holds the Marcia A. Dake Endowed Professorship in the College of Nursing. Dr. Hahn is Director for UK-CARES (Center for Appalachian Research in Environmental Sciences; P30 ES026529). Dr. Hahn is also the Director for the Occupational and Environmental Health Nursing (OEHN) Core of the NIOSH-funded Central Appalachian Regional Education and Research Center (CARERC). Dr. Hahn also directs the Kentucky Center for Smoke-free Policy and the BREATHE (*Bridging Research Efforts and Advocacy Toward Healthy Environments*) research team in the College of Nursing. Dr. Hahn conducts community-engaged environmental health outreach and research to reduce risk from tobacco use, tobacco smoke exposure, and radon exposure especially in disparate rural, lower-income communities. She leads two types of community-engaged research and outreach initiatives in implementation and dissemination science: 1) population-based environmental risk reduction intervention and observational studies; and 2) development and testing of evidence-based policy advocacy interventions guided by stage of community readiness to promote policy change. Dr. Hahn has worked with community partners to conduct several citizen science projects to reduce environmental risks from tobacco smoke and radon exposure.

AWARD

Barbara Resnick

PhD, CRNP, FAAN, FAANP

Barbara Resnick, PhD, RN, CRNP, FAAN, FAANP, obtained her BSN from the University of Connecticut, her MSN from the University of Pennsylvania, and her PhD from the University of Maryland. She is a professor in the Department of Organizational Systems and Adult Health at the University of Maryland School of Nursing, co-directs the Biology and Behavior Across the Lifespan Organized Research Center, holds the Sonya Ziporkin Gershowitz Chair in Gerontology, and does clinical work at Roland Park Place. Her research program is focused on optimizing function and physical activity among older adults, exploring resilience and genetics on function and physical activity, and testing dissemination and implementation of interventions in real-world settings. This work has been supported by the National Institutes of Health, Agency for Health Care Quality, and foundations such as the Helen and Leonard Stulman Foundation and the Robert Wood Johnson Foundation. Dr. Resnick has authored over 300 published articles, numerous chapters in nursing and medical textbooks, and books on restorative care and resilience. She is the editor of Geriatric Nursing and an associate editor and on editorial board for numerous other journals. She has held leadership positions in multiple aging and interdisciplinary organizations, including the American Geriatrics Society and the Gerontological Society of America and the American Medical Directors Association. She has been recognized for numerous national awards, the most recent of which include the 2017 David H. Solomon Memorial Public Service Award, the 2018 Johns Hopkins Leader in Aging Award, the 2018 Loretta Ford Award, the 2019 Lawton Powell Award, and the 2021 William Dodd Founder's Award for Distinguished Service. In addition to teaching and conducting research, Dr. Resnick continues to practice as a geriatric nurse practitioner in a continuing care retirement community.

AWARD

Frances Marcus Lewis

RN, MN, MA, PHD, FAAN

Frances Marcus Lewis, RN, MN, MA, PhD, FAAN graduated summa cum laude from Loretto Heights College, Regis University; obtained her MN degree in nursing at the University of Washington and her PhD from Stanford in the social sciences. She completed her post-doctoral studies at Johns Hopkins University, School of Public Health, and her Fellowship at Harvard Medical School. She has devoted her career to studying the impact of serious medical illness on household family members, including the index patient, spouse/caregiver, and school age children. Early work included longitudinal, descriptive studies using mixed methods with household families which enabled her and her team describe the explanatory mechanisms by which households were impacted by serious medical illness; cancer is her clinical prototype. Current work includes multiple Phase II and III randomized control trials, parents with end-stage cancer, and health disparities research.

She was selected as a Distinguished Professor of Oncology Nursing by the Oncology Nursing Society, the first nurse awarded the Susan G. Komen Cancer Survivorship Award, recipient of the Mayhew Derryberry Award from the American Public Health Association, chosen by the Society of Behavioral Medicine to deliver the Master Lecture, selected by the Japanese Society for the Promotion of Science as a visiting scholar, and elected as a visiting scholar and keynote speaker by universities and provider systems in Japan, Russia, Ukraine, Taiwan, Brazil, and by the National Cancer Institute and National Institute of Nursing Research, among other honors. She is currently the Endowed Professor of Nursing Leadership at the University of Washington Medical Center.

AWARD

Jillian Pintye

RN, MPH, PhD

Dr. Jillian Pintye is an Assistant Professor at the University of Washington School of Nursing in Seattle. Her research focuses on HIV and STI prevention and treatment, particularly among pregnant populations and adolescent girls and young women. Dr. Pintye is engaged in multiple studies related to pre-exposure prophylaxis for HIV prevention (known as PrEP) among women in Kenya, including clinical epidemiology and implementation science studies. Dr. Pintye is currently the Principal Investigator of an NICHD-supported R01 study that will systematically quantify infant pre- and postnatal PrEP exposure and assess birth, bone, growth, and neurocognitive outcomes following PrEP exposure into early childhood. Dr. Pintye is the co-Principal Investigator of an NINR-supported R01 grant which aims to test an mHealth intervention to improve PrEP adherence among pregnant Kenyan women in a randomized trial while also gathering implementation and cost data. She is also a co-investigator on multiple implementation science evaluations of point-of-care STI diagnostics, PrEP provider training, and approaches to enhance the reach and quality of PrEP delivery for young women. Her long-term goals are to increase access, effectiveness, and scale-up of HIV and STI interventions and to educate the next generation of nurse scientists. Prior to her academic career, Dr. Pintye was a Peace Corps Volunteer in Botswana, where she developed a passion for HIV prevention among women and children.

THE
President's
AWARD

Jacquelyn Taylor

PhD, PNP-BC, FAHA, FAAN

Dr. Jacquelyn Taylor is the Helen F. Petit Professor of Nursing at Columbia University School of Nursing (CUSON), where she is also the Founder and Executive Director of the Center for Research on People of Color (CRPC). Dr. Taylor has been a trailblazer in cardiovascular genomics research among minority populations, and diversity and inclusion efforts, having been the first black woman to earn tenure at CUSON, New York University School of Nursing, and the Yale School of Nursing. Dr. Taylor has been recognized for her contributions to the advancement of biomedical sciences, health care, and public health, having been elected to the National Academy of Medicine in 2019. Dr. Taylor is committed to mentoring students and faculty as she received the Columbia University Irving Medical Center 2021 Mentor of the Year Award. Dr. Taylor has been PI of many studies including, but not limited to, an R01 from National Institute of Nursing Research (NINR)- The Intergenerational Impact of Genetic and Psychological Factors on Blood Pressure (InterGEN), a Presidential Early Career Award for Scientists and Engineers (PECASE) award from President Obama in 2017, a P20 from NINR on Precision Health in Diverse Populations in 2018, and an MPI on an R25 on Research Opportunities in Cardiovascular Diseases for Minority Undergrad and Grad Students Across the Health Sciences (RECV) in 2020. In addition to leading these grants, Dr. Taylor founded the Office of Diversity and Inclusion at the Yale School of Nursing and served as its inaugural Associate Dean of Diversity, and then went on to become the inaugural Endowed Chair of Health Equity and to develop and direct the Meyers Biological Laboratory at NYU before joining Columbia University.

Called by Compassion. Destined to Discover

A Great Place to Learn, Teach and Do Research!

Research Faculty Positions

We are expanding our programs and seeking applications for **four** open-rank faculty positions.

Research focus areas include but are not limited to: resilience, environmental health, dementia caregiving, health promotion, infection prevention, food insecurity, health disparities and women's health.

For more information on positions and how to apply, visit:

www.louisville.edu/nursing/employment

Together, we transform and make a difference in education, practice and research - locally and globally.

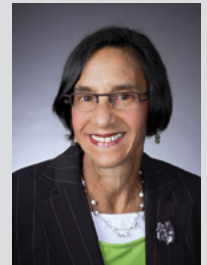

The UofL School of Nursing is an equal opportunity employer. It does not discriminate against employees based on race, religion, sex, national origin, age, disability or genetic information.

We put the RN in
GROUNDBREAKING.

The University of Maryland School of Nursing supports groundbreaking research and scholarship that enhance the field of nursing, influence modern health care, and spark new thinking behind the ways we care for each other.

The School is extremely proud to congratulate

**BARBARA RESNICK, PhD,
CRNP, FAAN, FAANP**

Professor; Sonya Ziporkin Gershowitz Chair in Gerontology; and Co-Director, Biology and Behavior Across the Lifespan Organized Research Center

on her recognition as a prominent senior scientist through the

2021 Ada Sue Hinshaw Award

from the Friends of the National Institute of Nursing Research.

RUTGERS

School of Nursing

Exciting Faculty Career Opportunities

Inaugural Vice Dean, Nursing Research

The Inaugural Vice Dean of Nursing Research will lead the school's research enterprise aimed at promoting health, guiding health care practices, and transforming lives. Core responsibilities will include cultivating externally funded, faculty-led programs of research with an emphasis on NIH or NIH-equivalent funding.

Endowed Chair – Community Pediatric Nursing

The François-Xavier Bagnoud Chair in Community Pediatric Nursing is supported by an endowment that aims to advance the delivery of comprehensive, community-based health care services to vulnerable children and children with special health care needs. This position offers the opportunity to conduct and apply innovative research and provide leadership in the delivery of the highest quality clinical care.

Endowed Chair – Oncology Nursing

The Rutgers Biomedical Health Sciences Endowed Chair in Oncology Nursing will enjoy a highly competitive, internal funding package for research expansion, and have the opportunity for a joint appointment at the Rutgers Cancer Institute of New Jersey. The goal of this endowment is to advance oncology nursing research, education, and evidence-based practices.

Congratulations to Jacquelyn Y. Taylor, PhD, PNP-BC, FAHA, FAAN,
Executive Director and Founder of the Center for Research on People of Color, for being the recipient of the
FNINR's 2021 President's Award!

Columbia Nursing scientists conduct innovative, rigorous, and interdisciplinary research that creates new knowledge to eliminate health disparities, and improves the health and health care of individuals, families, and communities worldwide.

The Columbia Nursing Centers of Excellence include:

- Center for Health Policy
- Center for Improving Palliative Care for Vulnerable Adults with Multiple Chronic Conditions
- Center for Precision in Symptom Self-Management
- Center for Healthcare Delivery Research and Innovations
- Center for Research on People of Color
- Center for Sexual and Gender Minority Health Research

We make lives better[®]

Our nursing researchers are devoted to improving health for all.

Lisa M Cleveland, PhD, APRN, CPNP, IBCLC, FAAN

Dr. Cleveland is dedicated to the lifesaving impact on the opioid recovery outreach in San Antonio.

Recent publication at: McGlothen-Bell K, Recto P, McGrath JM, Brownell E, Cleveland LM. Recovering Together: Mothers' Experiences Providing Skin-to-Skin Care for Their Infants With NAS. *Adv Neonatal Care.* 2021 Feb 1;21(1):16-22.

Jisook Ko, PhD, RN

Dr. Ko is passionate about making lives better through her research on different genotypes that determine whether a person responds to a high sodium diet, developing hypertension.

Recent publication at: Ko, J., Wang, J., Du, Y., Jiwani, R., & Li, C. (2021). Personalized Behavioral Nutrition Among Older Asian Americans: Study Protocol. *Nursing Research*, 70(4), 317–322.

Darpan Patel, PhD

Dr. Patel is focused on improving cancer outcomes through research on exercise intervention.

Recent publication at: Patel DI, Gallegos AM,* Sheikh B, Vardeman S,* Liss MA. A randomized controlled trial of a home-based exercise program on prognostic biomarkers in men with prostate cancer: a study protocol. *Contemporary Clin Trials Comm.* 2020 Oct 2:100659.

LEARN. CARE. DISCOVER.

Collaborate alongside some of the nation's top nurse scientists at Frances Payne Bolton School of Nursing — recognized globally for our leadership in nursing, education and research.

Research Areas:

- Symptom Science
- Family/Community Care
- Aging Across the Lifespan
- Self-Management of Health and Illness
- Neuroscience

BOLDLY TRANSFORMING HEALTH...TOGETHER

CU Anschutz – a hub for research and innovation

Propelled by a rich legacy and 120 year history, our research discoveries will transform the future:

- Leveraging the power of collaboration on campus, statewide and nationally
- Training the best and brightest scientists
- Catalyzing thoughtful strategy
- Generating evidence that informs innovative solutions

Indiana University

Looking for a place where you can inspire tomorrow's leaders in research?

IUSON is:

- ▶ Highly ranked in NIH funding: Top Ten in funding to public schools and #16 overall.
- ▶ Part of Indiana University's health science campus, surrounded by nearly half a dozen hospitals. We also partner with Regenstrief Institute which provides access to data and informatics assets.
- ▶ Sustained by the Office of Research Support that helps researchers to develop and carry out research and scholarly activities, advance clinical and education science, and improve health.

We are accepting applications for the Associate Dean for Research position.

UNIVERSITY OF UTAH COLLEGE OF NURSING

nursing.utah.edu

Join the University of Utah College of Nursing's dynamic research community and contribute to our robust programs of high-impact, collaborative science involving colleagues across the University of Utah, Health Sciences Center, and nationally. Faculty are actively engaged in preparing the next generation of researchers through our nationally known PhD program and T32 training grant.

We invite innovative scientists to apply for tenure-line faculty positions to expand critical areas of research including family caregiving, palliative care, informatics, cancer, women's health, diabetes, and metabolic disorders.

The University of Utah is recognized as a Top-Tier 1 Research University, and one of America's 65 leading research universities with membership in the American Association of Universities (AAU). The institution is located in Salt Lake City's Wasatch Mountains, which offer world-class skiing, hiking, mountain biking, and outdoor activities.

COLLEGE OF NURSING

Cancer[®]

**At MD Anderson Cancer Center,
research fuels our mission to end cancer.**

Our clinical trials program is one of the largest in the nation, offering opportunities for our community of over 4,400 nurses – including 240 research nurses and 600 advanced practice registered nurses – to serve as integral members of interdisciplinary teams that continue to raise the standard in cancer care. Our research nurse residency and APRN fellowship are the first of their kind, placing the nurse at the forefront of leading-edge cancer treatment development.

Our team's unwavering dedication to cancer care, research, education and prevention is why MD Anderson is again ranked No. 1 for cancer care by *U.S. News & World Report's* annual "Best Hospitals" survey and has maintained the American Nurses Credentialing Center's Magnet Recognition Program designation continuously since 2001.
